# Mitron

Information solutions for tomorrow's passenger

*Whether in Riyadh, Milan or Oslo, Mitron is there to provide you with the best in public transportation information systems and modern display solutions. We provide information solutions for tomorrow's passenger.*

Our proven and reliable products and systems will satisfy all of your public information needs, whether they are for on-board, railway or display solutions. The On-Board Solutions we offer for trains,

trams and metros are scalable: from high-quality displays to comprehensive and integrated systems for public address, intercommunication, CCTV and entertainment.

When it comes to Railway Solutions, we can offer advanced station management systems and displays for railway and metro stations to suit your needs. Our wide selection of Display Solutions, available with several different display applications, ensures the best possible fit for each installation – even in the most demanding of environments.

### International experience

Mitron Railway Solutions are used in a number of railway and metro stations across Europe and we are the preferred partner of many railway integrators and network operators worldwide.

We are also the trusted choice of several international vehicle manufacturers and our systems are running in over 500 railway vehicles in more than 20 countries. Mitron displays are designed for 24/7 use in a variety of settings.

Based on our broad experience, we can combine advanced technology, high-quality in-house engineering and local service capabilities with professional project management and accurate deliveries to anywhere in the world.

### Consistent high quality

We offer a wide range of high-quality products and systems, enabling flexible customization and easy integration with your existing infrastructure. All of these products and systems are subjected to a thorough testing and validation process to ensure they match your industry expectations.

Fully committed to meeting your needs with the right solution, we are also able to ensure the best value for your investment. Mitron quality is certified according to International Railway Industry Standard IRIS, and ISO 9001 and 14001.

### Lifetime companion

Mitron is the name for a lifetime companion. We are committed to supporting our technology solutions for the entire lifetime of your installation. Our continuous research and development of new technologies and dedication to quality keep us ahead of the times.

Our obsolescence management processes secure continuous technology support for more than thirty years. With our lifetime services, you can always reap the benefits of the latest technologies.

### Commitment to sustainability

A high level of environmental awareness is an integral part of our operation at every level. All of our products are designed with energy-efficiency and minimized power consumption in mind and the continuous research and development of these products keeps us on the path to sustainability. We keep a respect for the code of ethics at the core of our values.

### Information solutions for tomorrow's passenger

Mitron enables you to keep your passengers up-to-date with reliable, real-time information using our on-board, railway and display solutions. With our technology your tomorrow's passenger can enjoy secure, easy-going travel and you can make reliable announcements, timetables and security systems a part of daily life.

# Designed

with strength and durability

*Whether it's hot and humid or freezing cold, we will provide you with display technology that shows your information without fail, regardless of any surrounding conditions.*

Mitron TFT LCD and LED display solutions are designed for 24/7 use with city traffic, on public transportation vehicles, as digital signage, at gas stations, and within retail and industrial settings. Thoroughly tested worldwide to withstand environments as varied and challenging as cold, Nordic winters and the heat of Asia, our standardized, high-quality displays can offer reliability even under the most demanding conditions.

### Your partner for city traffic

Our displays are used successfully worldwide for platform information and timetable monitoring, both indoors and outdoor, as well as within vehicles. Our products and systems have a proven ability to be easily integrated into many city traffic environments. As we are a global forerunner in the design and development of display technologies, information is in safe hands with us.

### Reliability 24/7

Mitron product reliability comes from over 20 years of designing and developing display technologies. We offer display solutions with strong, vandal resistant construction, and a high tolerance for disturbances, mechanical stress, and solar radiation, in order to provide an all-condition performance. Spare part availability and customer service can assure that information is seen 24/7.

### Brightly visible

By selecting the best fitting technology for each situation, we can optimize the visibility of the information. Mitron displays provide advanced thermal management with automated temperature and brightness controls and an anti-reflective front glass that minimizes sun-reflections. For extreme visibility requirements, we recommend our Super High Brightness TFT LCD displays.

### Saving money and energy

When choosing Mitron, you can trust on long lifetime and low life-cycle costs of our products, and also reap the benefits of the integrated self-diagnostics, service-free operation and low power-consumption of the devices. With advanced LED backlight technology, the customer can enjoy even longer lifetime of the display and move further towards energy-efficiency.

# Wide

application range

Our wide range of standard products makes Mitron the best choice for a large number of applications, both indoor and outdoor. We also offer our customers a range of versatile optional features such as: interactive touch screens, integrated audio and camera systems and wireless communication.

### City Traffic Stockholm, Sweden

Mitron has supplied the city of Stockholm with over 150 TFT LCD and LED displays for their bus stops and stations, providing them with flexible real-time passenger information. Some of these displays also provide integrated text to speech functions, as well as a microphone connection to the control room. Mitron also maintains and services Stockholm's city traffic displays.

### City Traffic Trondheim and Stavanger, Norway

Mitron has supplied the cities of Trondheim and Stavanger with over 1000 TFT LCD displays for use on bus stops and inside busses, with Swarco Norge as integrator. The Mitron displays enhance the useability of public transportation in Trondheim and Stavanger with real-time passenger information.

### Dutch Railways' Trains, The Netherlands

Mitron has supplied over 5000 displays and more than 1500 media players to Dutch Railways in the Netherlands, with Nomad Digital as system supplier. Mitron was chosen for our leading display solution, and the TFT LCD displays and media players are now used for presenting passenger information on Dutch Railways' trains.

### Neste Oil Petrol Stations, Finland

Mitron was awarded a remarkable petrol station project in Finland. The order included over 1000 TFT LCD displays which were installed at hundreds of petrol stations around the country. All the displays were customer design and are used both indoors and outdoors. Mitron customer Seasam Digital supplied our displays to the end user Neste Oil.
